	Page :
1. Introduction	1
2. Geological Framework	3
2.1 Regional Setting	3
2.1.1 Geological Province	3
2.1.2 Structural Elements	5
2.1.3 Stratigraphy and Structural Evolution	7
2.2 Bjarmeland Platform	11
2.3 Loppa High	11
2.4 Hoop Fault Complex	12
3. Seismic Interpretation	15
3.1 Data	15
3.2 Seismic Interpretation Procedures	20
3.3 Geometry and Structuring of the Hoop Fault Complex	22
3.3.1 2D seismic Interpretation	26
3.3.2 3D seismic Interpretation	33
3.3.3 Time-Structure and Fault Maps	45
3.3.4 Time-Thickness Maps	56
4. Discussion	61
4.1 Fault Geometry and Its Genesis of The Hoop Fault Complex	61
4.1.1 Lateral Configuration	61
4.1.2 Fault Geometry in Dip Dimension and Its Genesis	62
4.1.2.1 Late Carboniferous Interval	63
4.1.2.2 Late Permian-Early Triassic and Early-Middle Triassic Intervals	65
4.1.2.3 Middle Triassic-Base Cretaceous Interval	66
4.2 Detachment	66
4.2.1 Late carboniferous-Early Permian Detachment	68
4.2.2 Late Permian and Middle Triassic Detachments	69
4.3 Positive Inversion	70
4.4 Geological History of The Hoop Fault Complex	72
4.3.1 Late Carboniferous-Late Permian	72
4.3.2 Early-Middle Triassic	73
4.3.3 Middle-Late Triassic	74
4.3.4 Early-Middle Jurassic	74
4.3.5 Late Jurassic-Early Cretaceous	74
4.3.6 Late Cretaceous-Recent	75
5. Summary	77
References	81
