Løver, M.A. (2015) *The ontogenesis of relative clauses in preschool children acquiring Norwegian*. Master thesis. Oslo: Department of Linguistics and Scandinavian studies, University of Oslo

1. **Page IX-X:** Osloforskning should have been mentioned in the acknowledgements for contributing with a very generous scholarship. With their help, I was able to work less and focus on my thesis. Thank you!
2. **Page 27:** Chapter 3.2 has misleadingly and erroneously been given the title “Specific language impairment and LARSP”, making it identical to chapter 3.3. The correct title of Chapter 3.3 is “Previous research”.
